

# ORIENT MOVEMENT TABLE

## 1955 to 1975

**Not all movements / models / variants may be listed – others will be added once verified in later versions of the Table.**

- Notes:**
- a) Movements and their respective watch models / variants are entered in chronological order by year of production
  - b) Where information is missing or is not fully confirmed / clear a '?' is entered or follows the data entry
  - c) Model variants / dial markings – markings may be one, or a combination, of the entered data whilst the main model name is in uppercase
  - d) Where model variants include a water resistant case the depth rating marked on the dial is entered in the dial markings column, e.g. '40m'
  - e) 'Features' are confined to obvious visible characteristics, e.g. date window, to aid identification

**Please feel free to download this Table for reference purposes. The file is 'read only' to avoid 'unauthorised' updating/circulation – printing is allowed. If you have information that is missing, or spot an error, please contact me ('Sweepband') via the following forums:**
