WATCHMAN'S CLOCKS

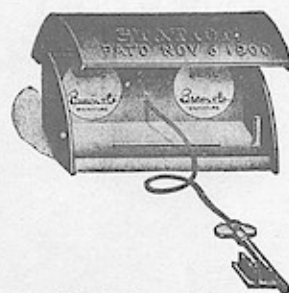

Prices Each.

Open, showing dial record.

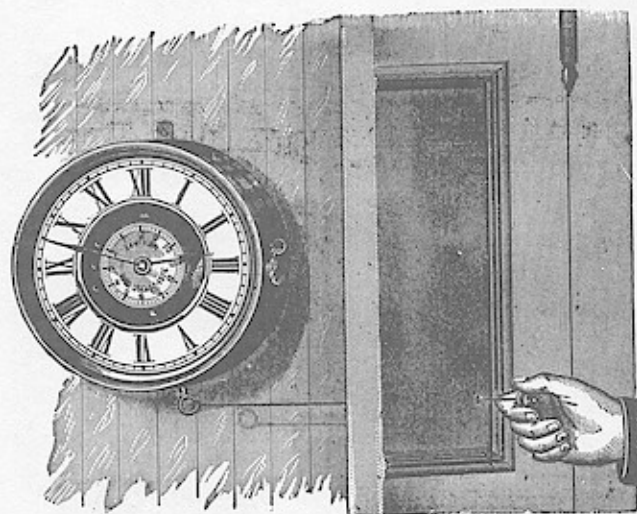

Station box and key.

THE NEWMAN WATCHMAN'S CLOCK.

Approved by the National Board of Underwriters and accepted by all Insurance Companies—Simple and Convenient.

This Newman Portable Watchman's clock is standard. It is in general use by mills and factories, railway shops, yards, depots and warehouses; in the larger stores, hotels and public buildings, state and educational institutions, hospitals and asylums; in mines, lumber mills, packing houses, etc. In many concerns it is the only system that can be used successfully and economically, and under any and all conditions it has proven itself after many years' service the most reliable and durable of all watchman's clocks. It requires no wiring and can be installed for service in an hour's time by any handy man. The movement is high grade and substantial. It should be cleaned and oiled about once a year, and this can be done by any near-by watchmaker at a reasonable cost. The station keys are so constructed and their action is such that it is a mechanical impossibility to duplicate the keys excepting by the use of the maker's dies and processes. New keys are furnished only to the proper authorities. The keys are attached to the station boxes by chains which cannot be joined together if once cut. Both keys and chain are made of rust-proof, non-corrosive metals.

The carving of these clocks is done by hand by the natives of the Black Forest, and is especially fine. The figures are accurate and life-like.

The FRONTS of these clocks are made of three layers of wood of opposite grain, and are set together to prevent warping and cracking.

The movements are made of the best tempered steel and brass, with screw pillars, patent ratchet-wheels, new escape wheel, and are well finished and adjusted. The same are guaranteed to be correct time keepers.

The famous Westminster chime played every 15 minutes, and the hours struck on four patented resonated bells. This patented chime-mechanism is the result of much thought and experiment in adopting laws for resonated bells, to the limits of space, price and other commercial requirements.

Eight-day Movement, 5-inch Porcelain Dial, Gold Plated Sash and Mat, Hand Carved Gold Gilt Ornamental Lines.

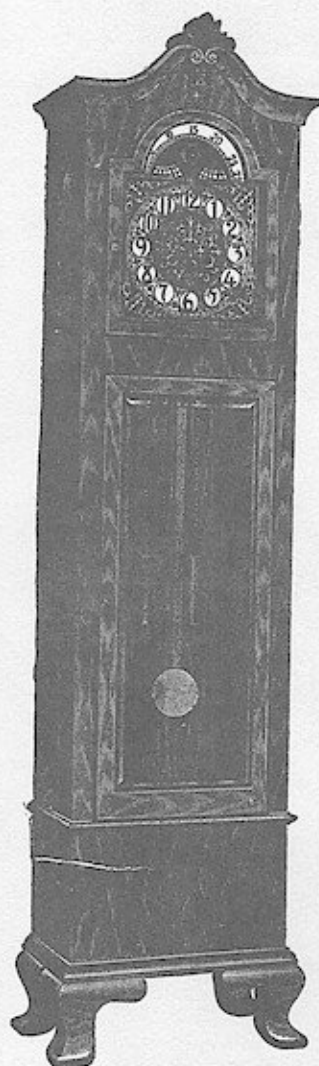

Both the time-strike movement and chiming movement are simple, durable and reliable. Can be easily cleaned and repaired by any dealer. The chimes may be set to "Silent" at pleasure.

IMPORTED NOVELTY ALARM CLOCKS.

Prices Each.

No. B5550. NEGUS. \$1.90

Nickel case. 4-inch Roman or Arabic dial, with negro face and moving eyes. One-day time and alarm. A good show-window attraction.

No. B5551. PHONO. \$3.50

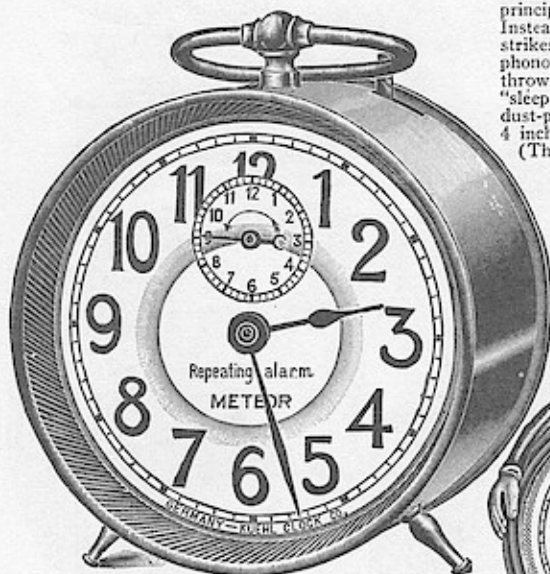

Alarm clock with noise producer on the same principle as the sounding disc of a telephone. Instead of the hammer striking on a bell, it strikes on a disc, and a horn, similar to a phonograph horn, increases the sound and throws it directly at the sleeper. The noisiest "sleep dispeller" ever made. Copper finished, dust-proof case; height, 7 inches; Arabic dial, 4 inches.

(The most powerful alarm made.)

No. B5552. JOKER MUSIC. \$4.80

Nickel-plated case, gilt front and handle. Glass on two sides. Height, 7 inches; width, 5 inches. This clock plays one tune for about ten minutes instead of ringing a bell. Music attachment with thirty-six teeth in the comb of the music box.

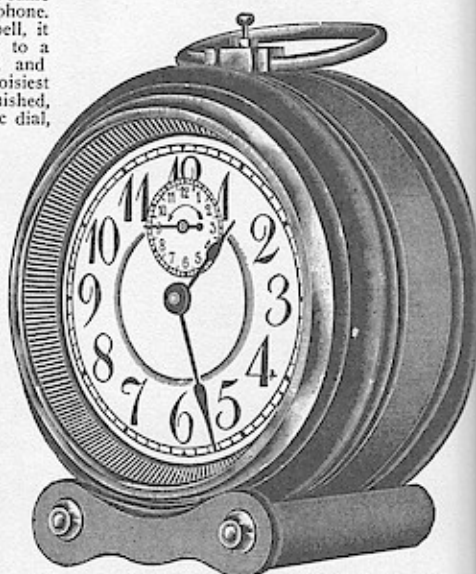

No. B5553. METEOR. \$1.70

Long intermittent alarm. Nickel case. Bell fr. back, 4-inch dial. Patent release for shut-off. Shut-off is released automatically when winding the clock. This patent automatic device moves the switch every time the alarm is wound, so that the clock will alarm at the time for which it is set. Alarm can be stopped at pleasure. Celluloid finish dial with raised numeral ring, the numerals therefore are very distinct.

No. B5554. JOHN BULL ALARM. \$3.80

Height, 8½ inches. 4-inch enameled dial. Figure and feet in metal, artistically colored. Hat represents the bell.

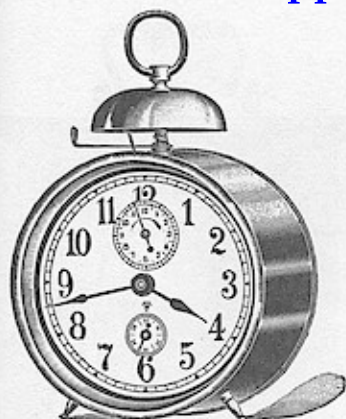

No. B5555. INTERMITTENT ALARM. \$3.80

Wooden case and base, mahogany finish. Height, 7 inches. Embossed celluloid dial, 4 inches, Arabic figures. Long intermittent alarm with automatic alarm stop, which is released when winding the clock.

WE are now shipping America Alarms in sealed cartons, each containing one dozen clocks and a liberal supply of advertising matter.—Four of these packages make a case lot and an order for one of these case lots or forty-eight clocks entitles you to the free printing of your name on dials.

The cartons are made of elastic, shock-absorbing, double corrugated board.—They are packed, checked, weighed and sealed at the factory; they reach you still under factory seal.—They not only insure you against breakage, against shortages, they save you store space, keep your stock clean and fresh and provide striking window trimmings for your clock displays.

BIG BEN

Himself—His Policy.

BIG BEN is a handsome, well built, refined and bright looking fellow with a clean-cut open face and a deep cheerful voice—a well-dressed, steady and punctual chap, up to the minute and always on the job.

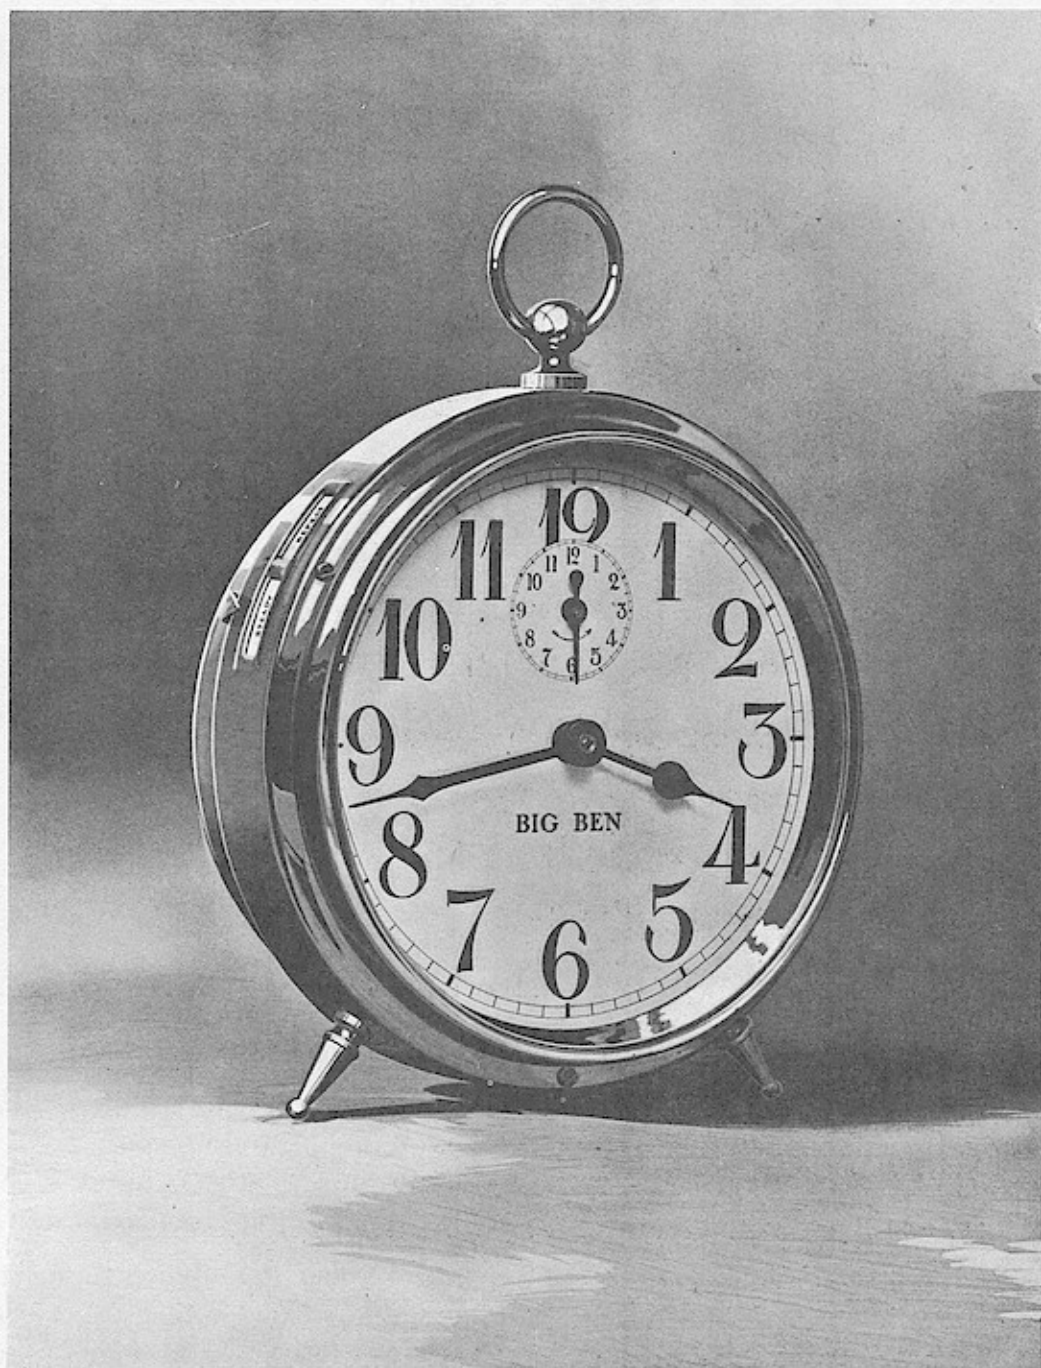

Works 36 hours at a stretch, runs overtime when needed—guarantees to wish you good morning when you want and either way you want—continuously for eight minutes, intermittently for fifteen.

Kind of p'ticular and very exclusive. Works *only* for *jewelers* and then *only* for *certain jewelers*—those that agree to sell him for at least \$2.50. Will never work again for those that break their pledge.

Big Ben is without exception the finest sleepmeter made—the best looking, the best built, the best running—he is handled by the best dealers, under the best policy, at the best profit.

Big Ben always comes to you straight from home, La Salle, Illinois—but he only comes upon receipt of signed price agreement. We pay his railroad fare on all orders for a dozen or more, we brand him with your name in lots of 24.

BIG BEN

The Jewelers' Alarm

Intermittent or Long Alarm. Height 7 inches. Dial 4½ inches.

The Ironclad Alarm.

"It Rings to Beat the Band."

IT'S a *snap* to sell an Ironclad.—It has so many selling points. Tangible, visible selling points, striking, convincing talking points. If it sells not *at sight* it'll sell *on hearing*. Bring one on the counter—point out how *sturdily* it stands, how *mightily* it's shielded, how *huskily* it's built.

Make them weigh it, make them set the alarm off, make them stop it.—Make them *wind* the alarm tight and see how *long* it rings, how *true* it rings, how *loud* it rings, then say "*One-Fifty, please,*" and bring down another.

Packed 12 in a box with advertising matter. Dealers' names printed free on dials in lots of 24. Height 5 inches. Dial 2½ inches. Weight 2½ lbs. Rings 35 seconds; can be shut off at will.
