**ELECTRIC
AND KEY WOUND**

**CLOCK MAKERS FOR
MORE THAN A CENTURY**

CATALOG No. 795

ISSUED SEPTEMBER 15TH, 1932

SETH THOMAS CLOCKS

ELECTRIC AND KEY WOUND

Correct Time

Because of the close association of the clock merchant with "correct time," his expert opinion has long been sought in the selection of a fine clock.

Today "correct time" has a broader interpretation. The clock prospect seeks council not only on the mechanical construction, but also on the style that is correct to add a finishing touch to a home decorative scheme. He prefers to make his purchase where *both*

key wound and electric clocks are featured together enabling him to consider the relative merits of each in an unbiased way.

This catalog presents a complete offering of key wound and synchronous electric Seth Thomas Clocks. Many are available fitted either way and are quickly identified by a star. The patterns shown have been carefully selected and the assortment is adequate to care for every style need.

Westminster Chime Clocks

THE three moderately priced Chime Clocks illustrated on this page offer a choice selection. To see the Roxbury, encased in American Walnut, is to be impressed with its perfectly balanced appearance. Note how the beautiful lines of the Marbury are enhanced by the contrasting panels. A marquetry inlay of distinctive design adds much character to the Westbury.

The Electric Clocks are for use on 110 volt, 60 cycle alternating current. They are also available for 50 cycle current.

The star (★) identifies the patterns available with either electric or 8-day fit-ups.

★ MARBURY

Electric Westminster Chime

Case Mahogany—contrasting panels
 Dial 5-inch silverplated
 Fit-up Self-starting synchronous electric. Quarter-hour chime
 Height 9 $\frac{3}{8}$ inches
 Width 20 $\frac{1}{4}$ inches

CHIME 50

8-Day Chime

Same as Marbury except:

Fit-up 8-day pendulum movement No. 124

★ WESTBURY

Electric Westminster Chime

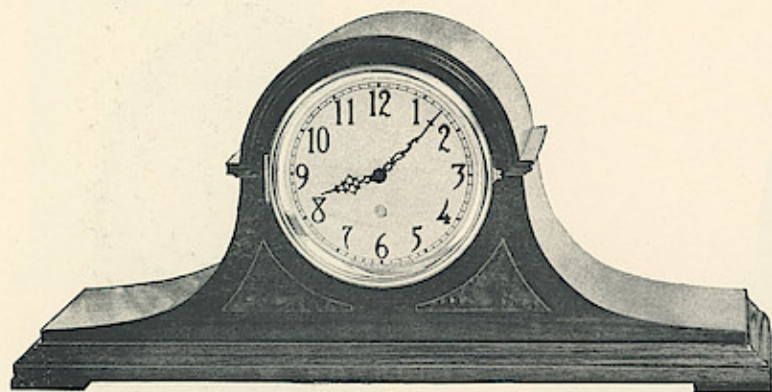

Case Mahogany—marquetry inlay
 Dial 5-inch silverplated with raised bronze numerals
 Fit-up Self-starting synchronous electric. Quarter-hour chime
 Height 10 $\frac{3}{8}$ inches

CHIME 53

8-Day Chime

Same as Westbury except:

Fit-up 8-day pendulum movement No. 124

★ ROXBURY

Electric Westminster Chime

Case American Walnut—burl panels
 Dial 5-inch silverplated with raised bronze numerals
 Fit-up Self-starting synchronous electric. Quarter-hour chime
 Height 9 $\frac{1}{2}$ inches
 Width 20 $\frac{3}{8}$ inches

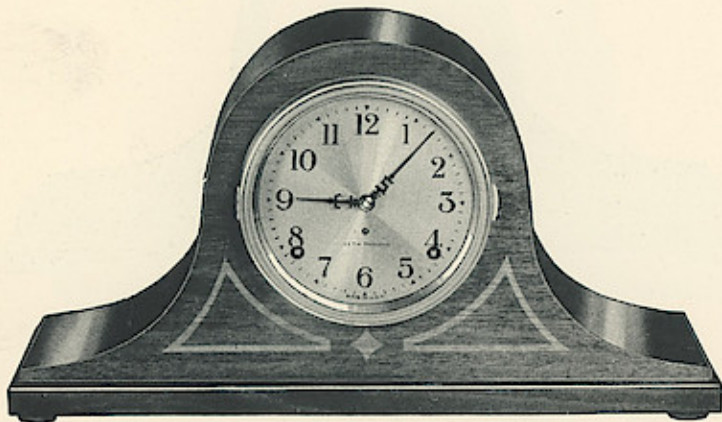

CHIME 52

8-Day Chime

Same as Roxbury except:

Fit-up 8-day pendulum movement No. 124

Cabinet, Mantel

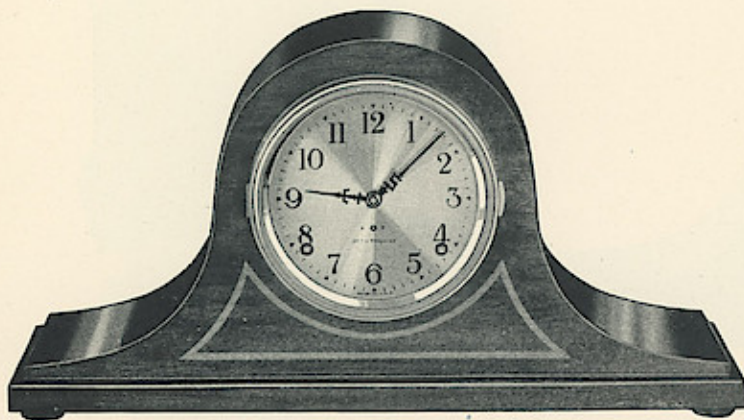

SENTINEL 15

8-Day Strike

Case Two-tone Mahogany
 Dial 5-inch silverplated
 Fit-up 8-day pendulum strike movement No. 89
 Height 9 inches
 Width 16¼ inches

THERE is a fine Seth Thomas eight day or electric clock to add a finishing touch to every home decorative scheme.

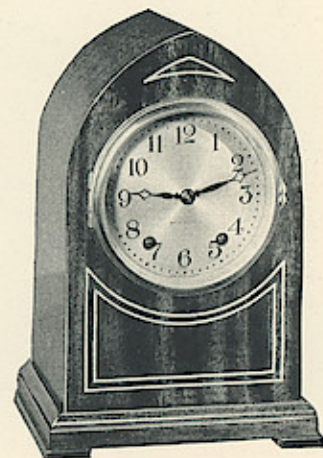

The Nanking in rich walnut is a distinctive Chinese Chippendale pattern. It embodies all the true character and charm of oriental design and reflects the effect of Chinese architecture in England.

CYMBAL 6

8-Day Quarter Hour Two-toned Strike

Case Two-tone Mahogany
 Dial 5-inch silverplated
 Fit-up 8-day pendulum two-toned strike movement No. 89
 Height 9 inches
 Width 17½ inches

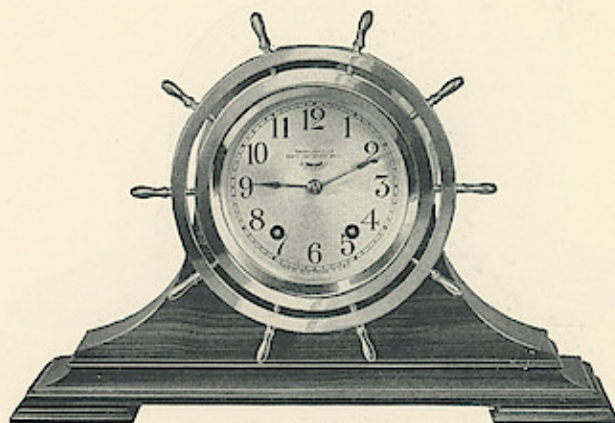

ESSEX

8-Day Strike

Case Inlaid Mahogany
 Dial 4-inch silverplated
 Fit-up 8-day pendulum strike movement No. 120
 Height 9½ inches
 Width 6½ inches

The Mayflower is a genuine ship's bell clock, mounted on the attractive mahogany base to give it added decorative value in the home.

The Tilton symbolizes the natural beauty and graceful sweeping lines that have brought renown to the tambour design. It is often the choice because of its wide adaptability.

MAYFLOWER

8-Day Ship's Bell Strike

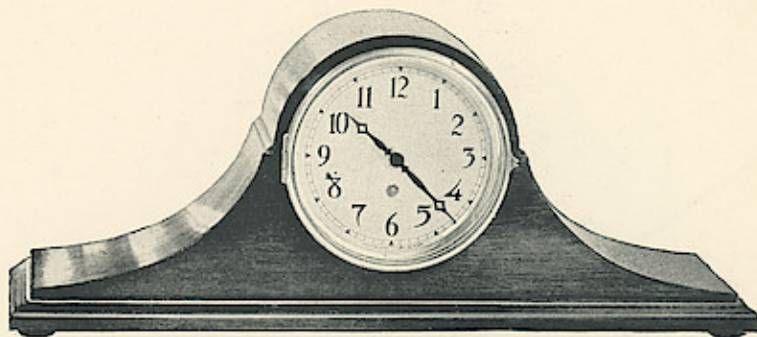

Case Cast brass head with mahogany base. Screw bezel
 Dial 4½-inch silverplated
 Fit-up 8-day seven-jeweled ship's strike movement No. 115
 Height 9¾ inches
 Width 13½ inches

NANKING

Electric Strike

Case Chinese Chippendale design in Walnut —burled panels. Metal top ornament is Chinese symbol of good luck
 Dial 4-inch silverplated reproducing design on ornament
 Fit-up Self-starting synchronous electric. Hour and half-hour strike
 Height 9¾ inches
 Width 7 inches

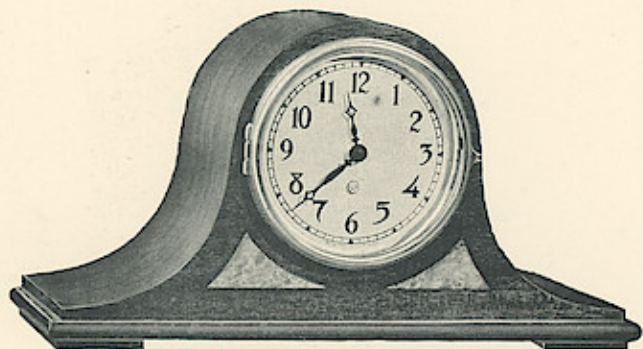

TILTON

Electric Strike

3-Day Strike

Same as Winton except:
Fit-up 3-day pendulum movement No. 120

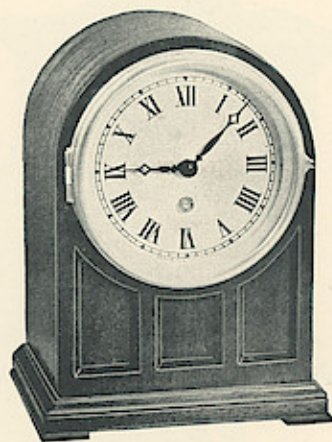

ABINGTON
Electric Strike

Case American Walnut
Dial 4-inch silverplated
Fit-up Self-starting synchronous electric. Hour and half-hour strike
Height 7 inches
Width 16¼ inches

FINE Clocks of this character are always in popular demand, because of their adaptable size. Trim and compact, they are ideal for use on the bookcase, table or small mantel. Gongs of genuine bell metal insure fine tonal qualities.

Those patterns marked with a star (★) are available either with key-wound or electric fitups.

NEWTON
Electric Strike

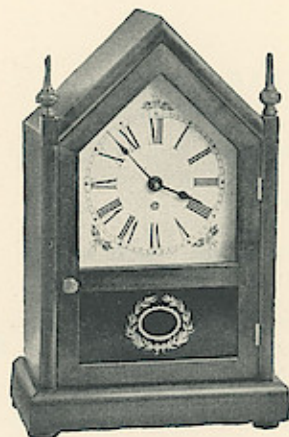

Case Mahogany—recessed panels
Dial 4-inch silverplated Roman
Fit-up Self-starting synchronous electric. Hour and half-hour strike
Height 3¼ inches
Width 6¼ inches

Electric and Eight-Day Colonial Clocks

THE "Duffield" has been fittingly described "The aristocrat of fine Banjo Clocks." The distinctive lines of the mahogany case are enhanced by colored panels depicting the historic "Boston Tea Party"

The Bennington is a direct descendant of the famous pillar and scroll design produced by Seth Thomas over a century ago. It emphasizes the authenticity of an Early American setting.

★ **MIDDLETON**
Electric Strike

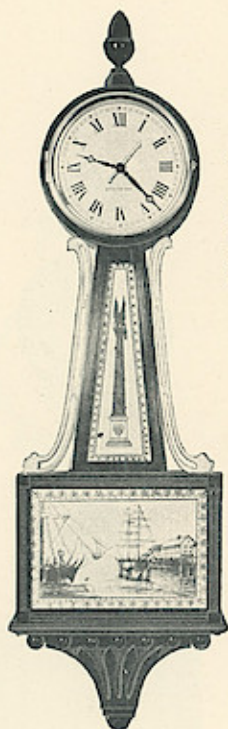

Case Red Mahogany finish on gunwood. Colonial decorative design in lower panel
Dial Flowered antique—Roman numerals
Fit-up Self-starting synchronous electric. Hour and half-hour strike
Height 14 $\frac{3}{8}$ inches

DURANGO
Electric Time

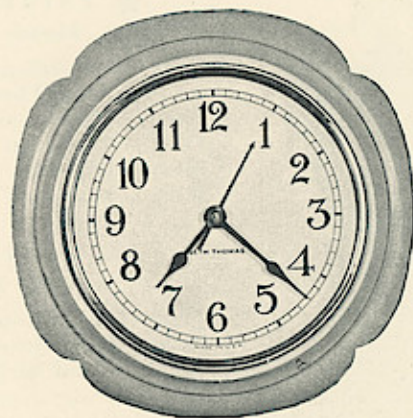

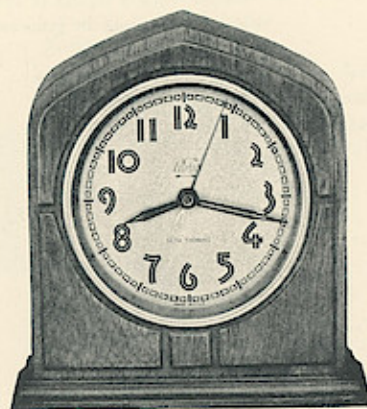

- Case Genuine Pedrara onyx with veinings in delicate shades of green, rose, yellow, gold or brown. Sides of black Belgian marble
- Dial 3¼-inch silverplated
- Fit-up Synchronous electric time
- Height 7 inches
- Width 5½ inches

THE handsome Seth Thomas patterns illustrated on these pages exemplify some of the finest achievements in the clockmakers art.

Utility has not been sacrificed in making the Echo America's most distinctive and beautiful Alarm Clock. The silvered dial, gilt mat and gun metal sash, set up a rich contrast with the mahogany case as a background.

ECHO
Electric Alarm

- Case Mahogany—paneled front
- Dial Distinctive 3½-inch silverplated with radio-type feature for setting alarm. Gun metal sash. Gilt mat
- Fit-up Self-starting synchronous electric with loud clear alarm
- Height 6¼ inches

Dial 3-inch silverplated
Fit-up 8-day, 4-jeweled movement No. 103A
Height $5\frac{3}{16}$ inches
Width $7\frac{1}{2}$ inches

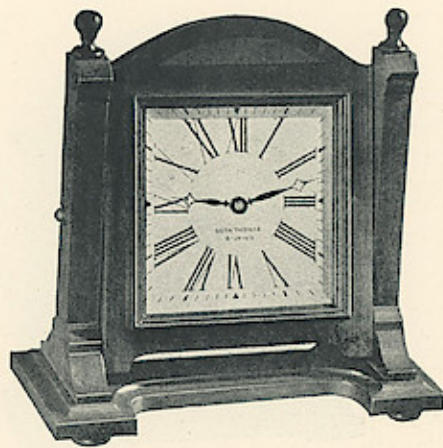

TYPICAL Seth Thomas quality in miniature. The finest of materials and expert workmanship have been employed in building the group of high grade boudoir and desk clocks illustrated on pages twelve and thirteen.

Jeweled bearings are used in the movements to assure the same unwavering accuracy that has characterized larger and more expensive Seth Thomas Clocks for over a century.

COLUMBIA
8-Day Time

Case Mahogany. Mahogany ship's wheel with brass spokes
Dial $2\frac{1}{2}$ -inch silverplated
Fit-up 8-day, 4-jeweled movement No. 103A

Eight and Thirty-Day Office Clocks

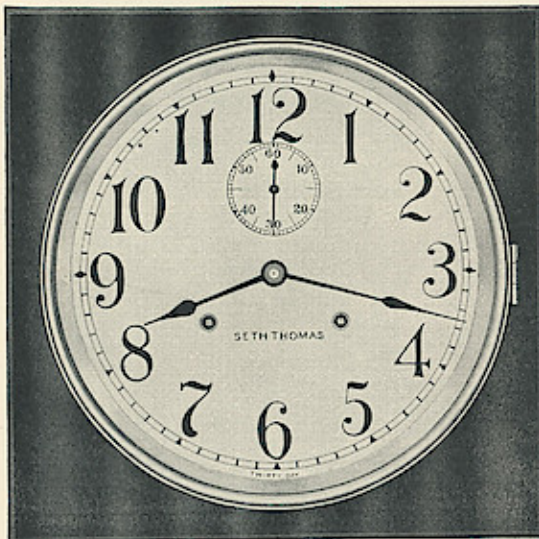

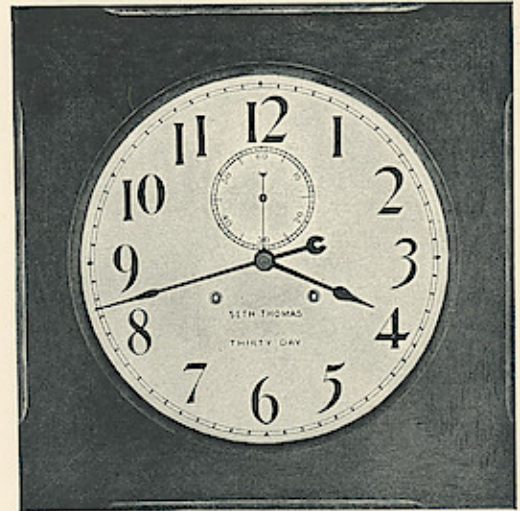

FOR railroad, shop, store or factory, there are no finer clocks than the trim businesslike patterns illustrated here.

The sturdy 30-day pendulum movements of the Hudson and Office No. 11 are equipped with the famous Graham dead beat escapement. This insures years of extreme accuracy in timekeeping with a minimum of attention.

Office No. 1 is supplied in the same style case as the No. 11 but has dependable 8-day movement.

HUDSON *30-Day Time*

Case	Mahogany or quartered oak
Dial	14 inch
Fit-up	30-day pendulum time movement No. 86 with Graham dead beat escapement
Height	18¾ inches
Width	18¾ inches

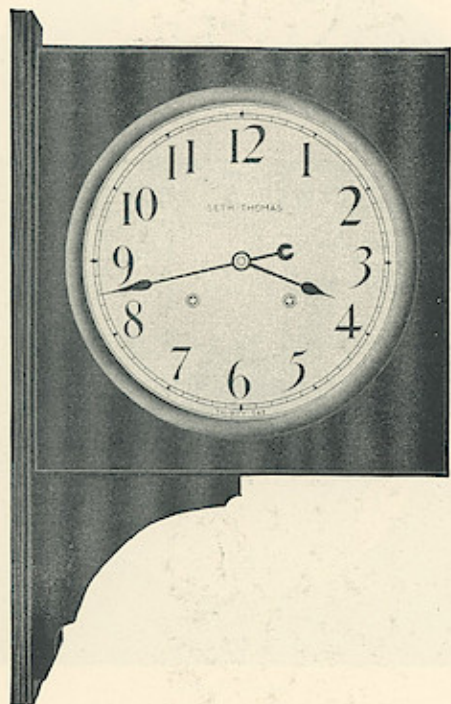

OFFICE NO. 11 *30-Day Time*

Case	Mahogany finish on gunwood or quartered oak
Dial	12-inch
Fit-up	30-day pendulum time movement No. 86 with Graham dead beat escapement
Height	15 inches
Width	15 inches

OFFICE NO. 1 *8-Day Time*

	Same as Office No. 11 except:
Fit-up	8-day pendulum time movement No. 41

Windows App : Images To PDF Maker
Thirty-Day Clocks

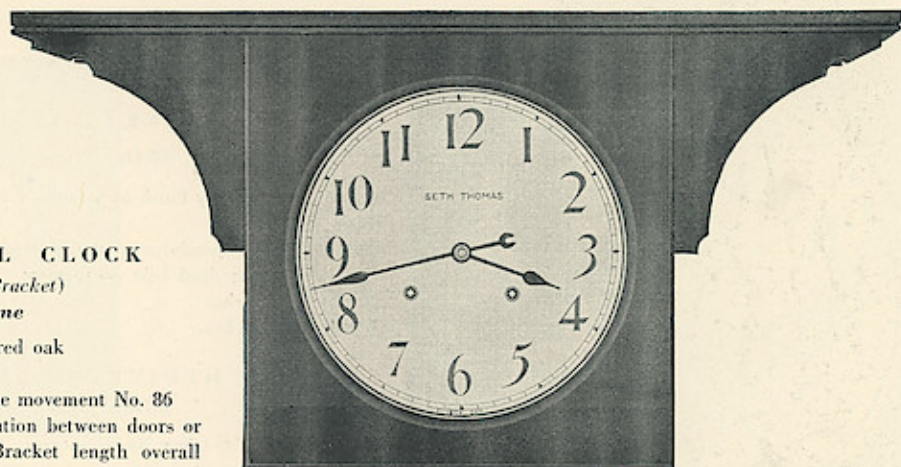

DDOUBLE Dial clocks are operated by a single 30-day pendulum movement. Their fourteen-inch dials are legible in very large double rooms or corridors. They are supplied with a ceiling bracket which may also be inverted and placed on top of a partition or with a wall bracket.

DOUBLE DIAL CLOCK

(With Wall Bracket)

30-Day Time

- Case Mahogany or quartered oak
- Dials 14-inch
- Fit-up 30-day pendulum time movement No. 86
- Bracket Designed to extend outward from the wall or post. Overall measurement including bracket 30"

DOUBLE DIAL CLOCK

(With Ceiling Bracket)

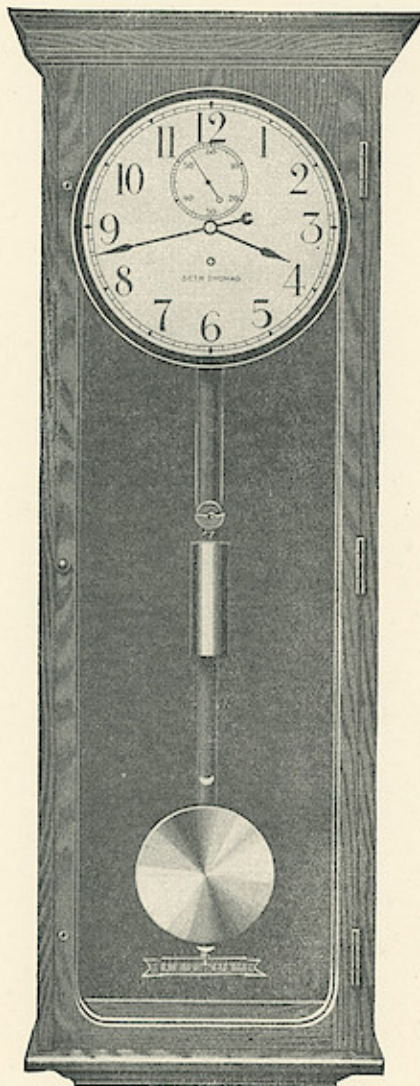

30-Day Time

- Case Mahogany or quartered oak
- Dials 14-inch
- Fit-up 30-day pendulum time movement No. 86
- Bracket Arranged for installation between doors or under ceilings. Bracket length overall 38"

Weight Regulator Clocks

GRAVITY is the most constant force known to science and as a result a weight driven clock properly constructed furnishes the most uniformly accurate time.

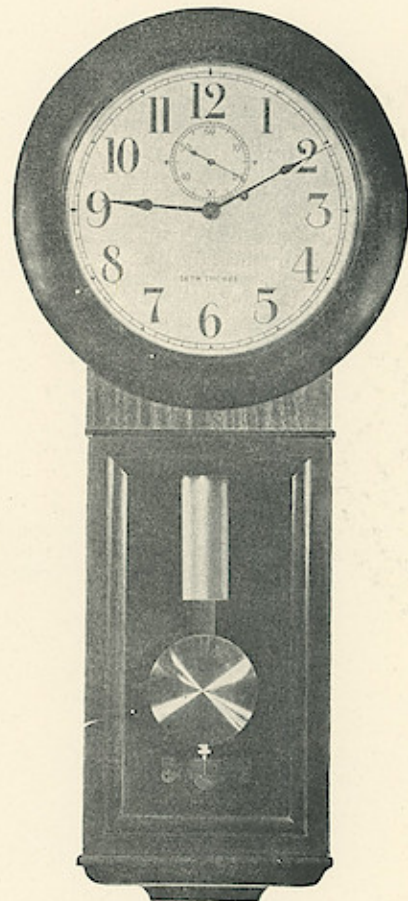

Regulator No. 70 is used by many great railroad systems, by jewelers and by watch and clock factories as a comparison clock.

REGULATOR NO. 70

8-Day Weight Time

Case	Mahogany or quartered oak
Dial	14-inch
Fit-up	8-day weight time movement No. 68 with beat adjuster (60 beats per minute)
Height	56 inches
Width	20 inches

REGULATOR NO. 2

3-Day Weight Time

Case	Mahogany or quartered oak veneer
Dial	12-inch
Fit-up	3-day weight time movement No. 77A (80 beats per minute)
Height	36½ inches
Width	15¼ inches
