# ALARM-CHRONO

## ALARM-CHRONO

They have slimness (now down to 3.85mm with the new 436 module), ample power life (up to five years), and the right price. Among the series is the latest 'face-touch control' watch using innovative lamina technology.

# RUNNERS

## STAYING AHEAD OF THE RACE

Casio's jogging watches have become good pals of the jogging crowd. They have features that can't be beaten, like electronically adjusting pace signals, daily performance read-offs, distances covered, stopwatch timing and all-weather protection.

Module No.	179	208

## EVERY TIME A WINNER!

Sports timing is so critical nowadays it takes an ultra-accurate and versatile watch to give absolute spot-on time information. This watch does just that, with split-split-second times and timing, signals and alarms and lots of other time data for records.

- W-500

# CALCULATOR

## FIGUREWORK ALWAYS AT HAND

Nothing beats calculating availability when it's right on the wrist. And when it can be done from a digital as slim as 6.6mm it's an even more attractive proposition. And, with the new TC watches, there aren't even any keys, just a mutable face that changes modes from time to calculating.

# Your Secret Telephone Directory on Your Wrist!

It stores all your important numbers, supplies them at a touch.

It also has...  
a World Time mode,  
Daily Alarm,  
Hourly Signals,  
Stopwatch,  
and a Calculator

(How to memorize telephone numbers)

- 1) Press (C) to move the display to telephone memory mode.
- 2) Press (A) or (B) to select a memory number. Keep pressed to move quickly.
- 3) Press (B) to set new numerals and letters.
- 4) A numeral can be entered in the flashing position by pressing the required numeral key. Hyphen can be set by pressing (C).
- 5) In the upper left position 4 letters can be set by pressing (A) or (B). The flashing position can be shifted by pressing (C).
- 6) Press (B) to complete.

# DATA BANK

It can also remember your personal data like passport no., car registration, insurance no., social securities no., safe combination, etc.

• Passport number

• Credit card

• Car registration

## FOR SPLASH, SHOWER, SWIM OR SCUBA

Whether simply to be worn in the wet or in robust watersports there's an athletic model here to shrug off water. All have been tested to varying depths, down to as much as 200 meters. Like the latest muscle model — the DW 500. It has a 7-year battery life, 4 separate alarms and is built to take the knocks of outdoor life.

# Finger-write Your Figures!

## On the Watch Face with a Finger-writing Calculator

Casio's electro-touch technology now brings you the watch face that actually reads finger-written calculations. Each figure and math symbol you outline on the face appears on the display, then take your finger across twice (=) and the answer presents itself like magic. You get the style, slimmness and light weight of a quality quartz watch with a refined analogue action, plus a discreet digital display giving time, date, calculations and the use of a stopwatch and daily alarm.

# QUARTZ CLOCKS

## FEATUREFUL & FUNCTIONAL

Casio has become an exponent of clock art with these contemporary models. They serve myriad useful purposes on a table or shelf, in an office or travel bag. They come with both digital and analog faces for every taste. The new "Wakey Wakee" alarm is a sure rouser, while the PQ-10 says it all for the traveller.

# HOW TO REPLACE THE BATTERY

## 1. Check the type of back cover

### Screw-in type

### Snap-on type (A)

### Snap-on type (B)

## 2. Removing the back cover

Place the watch on soft material, like buckskin, and hold it firmly.

With the Adjustable Case Opener, turn the back cover counter-clockwise.

Protect the back cover with a piece of tape before removing. Insert Opener A in the recess and move from side to side to make a gap between the cover and the case. Then use the opener to pry off the cover.

Case Opener A

Fit Case Opener B into the notch and pry open the back cover.

Case Opener B

## 3. Replacing the battery

Using a screwdriver, remove screw(s) from the battery holder. Replace dead battery(s) and attach the battery holder.

Avoid touching the contact (-) of the battery.

Never hold the contacts with metallic tweezers.

## 4. AC (ALL CLEAR)

As shown below, touch the AC contact and the battery (+) side with metallic tweezers. Contact should be about 2 seconds.

### IMPORTANT

a) Contacting AC (ALL CLEAR) is necessary, when a new battery has been put in, because the memories/counters may cause erratic displays.

b) On some models, pushing the light button will turn on the display.

## 5. Fitting the back cover

Using the Adjustable Case Opener, tighten the back cover.

Place the watch on a hand press and push the back cover in gently.

Hold the watch horizontally and snap-fit the back cover.

# DEGREE OF WATER RESISTANCE CASIO QUARTZ WATCHES

Please familiarize yourself with the correct applications, so that you can recommend the most suitable watch for your customers' needs.

NOMINATION	EXAMPLES OF USE	
	SUITABLE	UNSUITABLE
<b>WATER RESISTANCE</b>	 <p><i>Wearable while water is being splashed but not under any pressure.</i></p>	
<b>30M WATER RESISTANCE</b>	 <p><i>Wearable while water is being splashed but not under any pressure.</i></p>	
<b>50M WATER RESISTANCE</b>	 <p><i>Wearable around sinks, during athletic sports, in shallow waters, but not while scuba or professional diving.</i></p>	
<b>100M WATER RESISTANCE</b>	 <p><i>Wearable around sinks, during swimming athletic sports, poolside diving, but not highboard diving and surfing.</i></p>	
<b>200M WATER RESISTANCE</b>	 <p><i>Wearable while scuba diving at depths not requiring helium gas.</i></p>	

\* 50M WATER RESISTANT casing models do not permit underwater button operations.

\* 100M WATER RESISTANT casing models permit underwater button operations except where buttons are countersunk.

Should the watch be exposed to sea water, wash it well with clean fresh water and wipe dry.

\* Avoid button operations when soap or shampoo bubbles on the watch case. (Water-resistance may be impaired.)
